**The high-quality plastic
recycling machine.
Top brand quality at
a low fixed price.**

The new ReadyMac 500 is a robust plastic recycling machine that produces a reliable quality of recycled pellets at an extremely cost-effective price. This machine is in serial production, is in stock, available immediately, and comes with first-class service and spare parts support.

The best thing is that ReadyMac belongs to the renowned EREMA Group and uses EREMA TVE technology that you can rely on because it has already been implemented hundreds of times. All in all, this is a unique full-package solution. High performance and clever.

 ReadyMac

Ready for your project

Flexible allrounder for film and regrind material

Discover ReadyMac 500 – your flexible allrounder for plastic recycling. This recycling machine processes film, flakes, and regrind material from PE, PP, PS, PC and PA 6.0. to make high-quality recycled pellets. Regardless of whether you want to recycle production waste (inhouse and post industrial) or post consumer materials, ReadyMac is ready for your application.

Average output capacity in kg/h*

Polymer	output
LDPE, LLDPE, MDPE	500 kg/h
HDPE	450 kg/h
PP, PS, PC, ABS	500 kg/h

* all output rates quoted are examples that depend on the actual material properties (such as residual moisture, printed, degree of contamination, MFI, etc.) as well as the fineness of filtration.
